Raw item: "As a user, I want to reset my password via an e-mailed link so that I can regain access."
WordPiece tokens, max length L = 64
[CLS] as a user , i want ... [SEP]
Token + position embeddings (frozen in our run)
Transformer blocks 1-2 (frozen)
Transformer blocks 3-6 (updated)
back-prop
h[CLS] -> pre-classifier -> dropout -> linear layer
softmax over K labels: p(y | x)
training
Class-weighted cross-entropy (Eq. 1), AdamW, warm-up/decay
Label + confidence p_max, passed to the confidence gate
